

経済体制論Ⅳ (Comparative SystemsⅣ)

Economic

科目ナンバリング ECT-304
選択 2単位

杉浦 史和

1. 授業の概要(ねらい)

This class aims to understand varieties of Economic Systems. Nowadays there is actually one economic system, i.e. Capitalist Economic System. But historically speaking, there has been an alternative. In fact in the era of the Cold War, dozens of countries functioned as a Socialist Economic System. Therefore, we want to understand whether there should be an alternative to take in the current situation. People have tried very hard to take a necessary Economic System to make use of it. In a sense, current China's and Russia's administrations are very eager to adopt a best suitable Economic System to make the countries more prosperous and strong. In the history of Japan, our ancestors were also one of those who pursue the best Economic System to take before WW2. In fact, the Former Prime Minister of Japan, Nobusuke Kishi, whose grandson is, as you may know, former Prime Minister, Shinzo Abe, was the chief planner and organizer of the new Economic System in Manchuria. By looking back at the history of Manchuria, we can learn much about the functioning of the Economic System. We should also take a close look at the development of postwar Japan, as Prime Minister Kishi had a strong influence in forming the Economic System of postwar Japan.

2. 授業の到達目標

Students can tell the specificities of the Economic System in Manchuria in comparison with mainland Japan's Capitalist Economic System. Students also have to understand the effects left behind for Japan's economic development after WW2.

3. 成績評価の方法および基準

After each class, students have to submit a reaction paper on the LMS which should be counted as an attendant point. The total of an attendant point will be 28. The rest will be calculated by the final examination, which should be 72 maximum.

4. 教科書・参考文献

教科書

The lecturer will provide the necessary data and resources for study.

5. 準備学修の内容

The students who want to understand the functioning of the economy as a social system will be welcome. They always have to have an acute interest in the development of the economy, specifically Japan's post-war period development model. Questions and comments are always welcome.

6. その他履修上の注意事項

Japanese students will be welcome although the course will be given only in English.
