1. 授業の概要(ねらい)

Global demand for infrastructure is enormous with rapid urbanization and economic growth of emerging countries specially in Asia. Japanese companies are capitalizing these opportunities and the Japanese Government's strategy is to support Japanese companies in export of infrastructure system as an important growth strategy.

Through the course, analysis on the several business fields of infrastructure system export is made based on my working experiences in the trading company and the engineering company.

The course is designed to assist students to understand the characteristics of business fields of infrastructure system including its export as well as strength/challenge of Japanese companies active in those fields.

This course aims to help students to make use of the knowledge gained through these analysis for their future carrier formation.

2. 授業の到達目標

The goal of the course is that:

①the students understand characteristics of business fields of infrastructure system including its export as well as strength/challenge of the Japanese companies in at least in one business field of infrastructure system.

②the students can explain the above objective in the report submitted at the end of semester and explain the outline in his/her presentation. Discussion will be made among students on the presentation.

3. 成績評価の方法および基準

Evaluation of study results is basically made on the following manner:

①Evaluation of the report : 60%

②Evaluation of presentation and discussion: 40%

4. 教科書・参考文献

教科書

I do not use the textbook. As there are several public reference documents, I explain such documents through the course.

5. 準備学修の内容

Students are requested to read the documents or articles related to infrastructure development in order to deepen their understanding.

6. その他履修上の注意事項

I may invite guest speaker who is expert of specific infrastructure business field . Site visit to related infrastructure facility may be arranged.

7. 授業内容

- 【第1回】 <Introduction>
Explanation on lectures, evaluation of study results, etc
- 【第2回】 <Overall explanation on Infrastructure Development and Strategy for System Export>
- 【第3回】 <Lecture on business field : Energy>
- 【第4回】 <Lecture on business field : Renewable Energy>
- 【第5回】 <Lecture on business field : Railway>
- 【第6回】 <Lecture on business field : Airport>
- 【第7回】 <Lecture on business field : Power>
- 【第8回】 <Lecture on business field : Water Supply and Sanitation>
- 【第9回】 <Lecture on business field : Harbor, Construction and Urban Development>
- 【第10回】 <Lecture on business field : ICT (Information and Communication Technology) and Food>
- 【第11回】 <Lecture on business field : Road and Healthcare>
- 【第12回】 <LMS Lecture on business field : Shipbuilding and Steel>
- 【第13回】 <Wrap-up , Guest speaker or Site visit>
- 【第14回】 <Report and Presentation by Students/Discussion>
- 【第15回】 <Report and Presentation by Students/Discussion>
