

Flight Training for Private Pilot 3

Syllabus Number

2E309

Special Subjects

Elective 2 credit

IMAI, Michio

1. Course Description

Students need to establish the skills to learn in "Private Pilot 1, 2." Train individual improvements in order to pass the private pilot practical test.

This subject is related to the diploma policy DP2, 4 and 5.

2. Course Objectives

Student need to learn enough skill and knowledge to pass the private pilot practical test.

3. Grading Policy

Students are evaluated based on grading policy. Participation (Preparation and enthusiasm for training) will be evaluated, as well.

Debriefing meeting will be held and feedback will be given after flight training.

4. Textbook and Reference

Textbook

Pilot's Operating Handbook

ALP

Navigation plan and flight procedure ALP

Reference

Chart, plotter, flight computer and others

5. Requirements(Assignments)

Students are required to review previous training to clear next object.

Please check your weak and strong points by reviewing flight reports and record.

•Preparation : Define flight plans and prior items before each training. Imagine how to work out those preparations in practical trainings. 1.5 hours of preparation is required. Organize the knowledge in notebooks.

•Review : Review the training, issues and instructor's advices. Study appropriate solution and learn related topics. Review and organize the knowledge in notebooks (1.5 hours).

6. Note

Training starts in August. Please prepare for the private pilot practical test.
