

Introduction to Medical Sciences

Syllabus Number

5L360

Special Subjects

Elective 2 credit

KAJITANI, Masayuki

1. Course Description

In this course, we will invite seven teachers who are in charge of education and research on "modern medicine", and will hold lectures conducted by each teacher.

2. Course Objectives

Learning from this course, you will be able to understand that modern medicine is compounded with various advanced science.

3. Grading Policy

Every time I will ask you to submit an assignment report. The final grade will be calculated based the total of those evaluations.

4. Textbook and Reference

Textbook

There is no designation for both textbooks and reference books. Depending on the instructor, print teaching materials may be distributed.

5. Requirements(Assignments)

Please be interested in articles related to medicine taken up in scientific journals and newspapers and try to understand the relationship between novel medicine and contemporary science.

Also, after the lecture, please ask each instructor's teacher not only the contents of the lecture, but also the opportunities to deepen your understanding by asking what you care about usually.

6. Note

Since the schedule is adjusted with other intensive lecture courses, students can take both courses. However, please register your course separately on your own.

Each lecturer will be conducted once, and we have 7 lectures scheduled. At the beginning of the fiscal year, 7 lecturers who will be invited to this year are undecided. Since it is the second semester course, at the beginning of the second semester, I will clarify the lecturers, the theme, and let you know through bulletin, etc.

7. Schedule
