# Laboratory on Computer Network

Syllabus Number

3D324

Special Subjects Elective 1 credit

SASAKI, Shigeru

## 1. Course Description

This course deals with the following topics: (1) the fundamental skills for working with Linux, (2) the basic skills for setting up network facilities on Linux, (3) the installation and setting up technique of various servers such as a DNS server, a Web server and a mail server, etc. In the lessons, students exercise using a virtual machine for his/her private use. This course is related to diploma policy DP2 and DP4M.

## 2. Course Objectives

By the end of the course, students should be able to do the following:

- explain basic knowledge of Linux OS and network settings.
- explain functions of a DNS server, a Web server and a mail server.
- acquire a technique of setting these servers.
- acquire a technique of creating Web pages using the contents creation tools.

## 3. Grading Policy

Grading will be decided based on repots (100%).

Feedbacks on reports and examinations will be given on LMS.

#### 4. Textbook and Reference

Textbook

The Learning materials are published on the LMS.

## 5. Requirements (Assignments)

The students are expected to read lecture materials and fill blanks on "main point notes" as preparation. It takes approximately one hour to finish this work.

#### 6 Note

Absence and non-submission of reports are not accepted.

### 7. Schedule

Introduction, basics of exercise environment of Linux

Basic network settings

Name server settings

Web server settings

Mail server settings

Wiki server settings

Plone server settings
