

Special Laboratory Work I on Advanced Science and Engineering

Research Subjects
Requisites 4 credit

Each Staff

1. Course Description

Graduate students in the 1st year prepare their research plans, conduct preliminary experiments, and then determine themes of their master's thesis research. They can also conduct their master's thesis research in other related institutions including universities, public institutions, and private companies.

2. Course Objectives

Graduate students in the 1st year of the master course prepare the research for their master theses.

3. Grading Policy

Learning results will be evaluated by presentation of progress reports on the student's master's thesis research.

4. Textbook and Reference

5. Requirements(Assignments)

Preparation of master's thesis.

6. Note

7. Schedule

Graduate students report on progress of their master's thesis research under the direction of their academic supervisors.
