

# Colloquium I on Advanced Science and Engineering

Research Subjects  
Requisites 2 credit

Each Staff

## 1. Course Description

In the colloquium, graduate students in the 1st year will explain and discuss the contents of original papers related to their doctor's thesis research. Their academic supervisors will give advise or comments on the explanation and discussion so that the graduate students can improve their ability to read and understand those papers.

## 2. Course Objectives

The aim of this colloquium is to improve the ability of graduate students in the 1st year of the doctor's course to read and understand original research papers in the related research fields.

## 3. Grading Policy

Learning results will be evaluated by research plans proposed by the graduate students.

## 4. Textbook and Reference

## 5. Requirements(Assignments)

The colloquium will be conducted by graduate students and their supervisor(s) in a laboratory or a few laboratories in the related research fields.

## 6. Note

## 7. Schedule

Respective supervisors will suggest how to manage the colloquium.
