

Introduction to Design

Syllabus Number

0F101

General Basic Subjects

Elective 2 credit

CHIBA. Tomoji

1. Course Description

This course introduces students the basic knowledge and manners in order to understand what the design is.

First, they will learn the words and the background they should know in the field of broad fine arts and design, and develop professional understanding of design concepts, theories, and events.

In this class, students acquire knowledge and attitudes for the diploma policy.

This subject is related to 1, 3, and 4 of your study goals.

2. Course Objectives

You can acquire

- basic knowledge on design concepts, theories, events, tradition, and the latest aesthetics.
- the ability to understand culture of Japan and other countries.

3. Grading Policy

Evaluation on every small report 40%

Final Report rating 60%

The results are evaluated based on the above.

4. Textbook and Reference

Textbook

Materials for each lecture will be distributed.

Various video materials in conjunction with the lecture contents (PowerPoint, DVD)

5. Requirements(Assignments)

The small reports to be submitted every time to confirm your preparation for the lesson and your understanding of the contents explained in the lecture. For the related matters, it is important to search information and give your own opinion in your own words.
