

Sports and Health Science

Syllabus Number

0C211

General Basic Subjects

Elective 2 credit

TBD

1. Course Description

We aim to become able to actively engage in sports activities to maintain and promote health in order to live a healthier and more fulfilling life for the entire lifetime. This course relates to learning objective 3 and 5 (liberal education).

2. Course Objectives

In this lecture, we will take up health problems in modern society and think about the role that sports play in maintaining and improving health. In addition, we will deepen our understanding of the effects of sports on child development, women's health maintenance and promotion, and preventive nursing care for elderly people.

3. Grading Policy

Examination (80%), Participation attitude and small report(20%).

4. Textbook and Reference

Textbook

Materials will be distributed as needed.
