

Study of Modern Aviation Industry, Part2

Syllabus Number

2H207

Special Subjects

Elective 2 credit

TORIUMI, Kotaro

1. Course Description

This program aims to cultivate the basic knowledge of aviation industry with/under COVID-19, moreover, focuses on the business model of LCC (Low Cost Carrier) in the world. Students get to understand the industry trend through taking this class. DP1&2

2. Course Objectives

This seminar serves students the latest aviation industry information for example, full service carriers (such as ANA, JAL, Lufthansa and Emirates). Additionally, Japanese LCC (Low Cost Carrier) companies (also known as budget airlines) born in 2012 will be also introduced in this seminar.

Students will learn the mechanism of LCC and their marketing strategy, thus, they can obtain the knowledge about the aviation industry in the current and for the future circumstances. Furthermore, this seminar will deal with the necessity of the aviation infrastructure to support for Tokyo Olympic and Paralympic Games held in this year.

3. Grading Policy

Based on final exams, also include mid-term exam results (final exam 80% mid-term exam 20%)
